ELVX Add-On for Salvage Disposal

> [Guidewire PartnerConnect™ Solution Overview](#)

The Insurer Challenge

P&C insurers have long known the challenges associated with the identification, segmentation, and disposal of low-value, end-of-life (ELV) vehicles as well as badly damaged and ELV commercial assets. The high cost associated with the transportation, field charges, claims handling and cycle time, as well as the fee structures at a traditional auction often result in a net loss of these assets for the Insurer.

The Solution: <solution name>

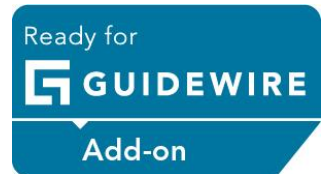

ELVX integrates with ClaimCenter to enable users to assign older, high-mileage, end-of-life (ELV) vehicles or heavily damaged commercial assets to an alternative salvage process from First Notice of Loss (FNOL) or Total Loss Determination (TLD). ARS manages the entire disposal service and delivers real time updates without leaving ClaimCenter

Solution Benefits

- **Segmentation tools** to identify predictive total loss ELV units
- **Drastically discounted fees** for buyer and seller
- **Higher recoveries** gross and net
- **Alternative title solutions** for faster processing
- **Alternative method** of inspection for faster settlement

Integration Benefits

- **Streamlined processing** within ClaimCenter
- **Customized configurations** and dynamic workflows
- **Automated notifications** and custom reminders in ClaimCenter
- **Comprehensive reporting** KPIs, recoveries, milestones, and cycle time within ClaimCenter
