

We do the legwork so you can focus on handling the claim.

Streamline claims processing with LexisNexis Police Records.

LexisNexis Police Records offers a single source of police reports that can help carriers process claims more efficiently and effectively.

Simplify police report ordering while saving time and money

Police report ordering can be complex. There are more than 50,000 agencies across all 50 states that distribute current and historical police records, ranging from local law enforcement and sheriff departments to fire departments. No two agencies are the same. Each agency has its own requirements for ordering, delivery and type of report data. The number of reports grows daily. All of this can make accessing the information you need difficult. We can make it simpler.

By acting as a single source of police reports in all 50 states, US territories, provinces and Canada, we offer you a more convenient and secure process for getting the information

you need from other agencies through more flexible delivery options. In addition, reports can be archived for up to two years (based on state laws), to help eliminate manual retrieval and duplicate order expenses. Our direct relationships with agencies enable us to optimize delivery methods and turnaround times.

Expedite police reporting with LexisNexis Risk Solutions technology

LexisNexis Risk Solutions uses a number of methods to secure police reports and help ensure faster turnaround times – these methods include agency contribution to the eCrash database, mail, fax, courier, email and online ordering.

Revolutionizing Police Report Capture and Delivery

LexisNexis Police Records are enhanced with the advanced technology we offer to police departments. When officers respond at the scene of an accident, our proprietary software allows

them to complete their accident reports on their laptops from within the safety and convenience of their cruiser. The reports can be easily uploaded, approved and made available to both insurers and insureds. Insurance carriers can choose to order the PDF versions or extract the data elements from police reports – all delivered directly to a carrier’s claims management system.

Select from a variety of report options

LexisNexis Police Records offers a comprehensive selection of report types to choose from, so you get the right information you need to process claims more efficiently and effectively. Reports are delivered via image or data elements. Sample report types include:

- Accident reports and photos
- Arrest reports
- Auto theft and recovery reports
- Autopsy and coroner reports
- Driving under the influence (DUI) reports
- Emergency medical services (EMS) reports
- Face and log sheets
- Homicide reports
- Structure fire reports
- Theft and burglary reports

Sample data extracts from police reports can include:

- Airbags deployed
- Fatality indicator
- Citation information
- Known or suspected violations
- Contributing circumstances to loss

Speed up claims resolution and get more from your resources

Getting police reports in a timely manner can help you close simple claims more quickly—freeing up adjusters to focus on severe or complex claims. By providing critical, time-sensitive information, our solution also enhances fraud detection efforts and the discovery of subrogation opportunities.

Choose the order and delivery options that work best for you

You can order reports through one of our convenient, secure, online portals or via system-to-system integration. Reach out to LexisNexis Risk Solutions representative to discuss the method that would work best for you.
