

Turning Data into Action

Betterview's Remote Property Intelligence Platform empowers underwriters to reduce loss and expense ratios — and provide a consistently positive customer experience — at every stage of the policy life cycle.

86% of platform users report taking direct action after viewing Betterview's actionable property insights.

Quoting:

Provide more accurate quotes with less effort, improving your customer experience and conversion from quote to bind.

- Know the condition and perils of a property upfront before bind and issuance
- Reduce the review time and quote cycle time for submissions
- Reduce friction in a manually intensive property underwriting process

Claims:

Betterview gives you tools to gain an accurate understanding to confidently pay claims and avoid litigation.

- Pre-FNOL
- CAT Response imagery (when available)
- Property condition assessment prior to loss
- Post-payment repair verification

Underwriting:

Improve the speed and accuracy of Underwriting by filtering properties so you can spend time where it counts.

- Know the true condition of a property prior to policy issuance
- From prefill data to historical weather events, Betterview has extensive data that will help your team become better underwriters
- Leverage previously unavailable data to make smarter bets on risk and segment your book of business accordingly

Renewal:

Properties change over time. When a policy is up, take the opportunity to assess and manage risk.

- Know the true condition of a property prior to policy renewal
- Understand if property condition has degraded since the last renewal
- Have a line of sight into which properties present the highest propensity for claim and how to take the appropriate action

A major carrier saw **20% decrease** in roof-related losses, despite a **30% increase** in major wind events!
