

OCTO

Technology for a better quality life

REAL LIFE APPLICATIONS

octotelematics.com

The COVID-19 pandemic has imposed many behavioural changes. In such an extraordinary situation, OCTO offers a range of innovative solutions to help people and companies find a new normal.

Let's **shape the future,** together

We are experiencing a major health, social and economic crisis due to the COVID-19 pandemic. OCTO is at the forefront of creating innovative telematics solutions for a more connected life.

Photocatalytic Oxidation. What is it?

Photocatalytic Oxidation destroys:

Bacteria

Fungi

Viruses

Mould

Dust mites

Bad odours

VOCs

Tobacco smoke

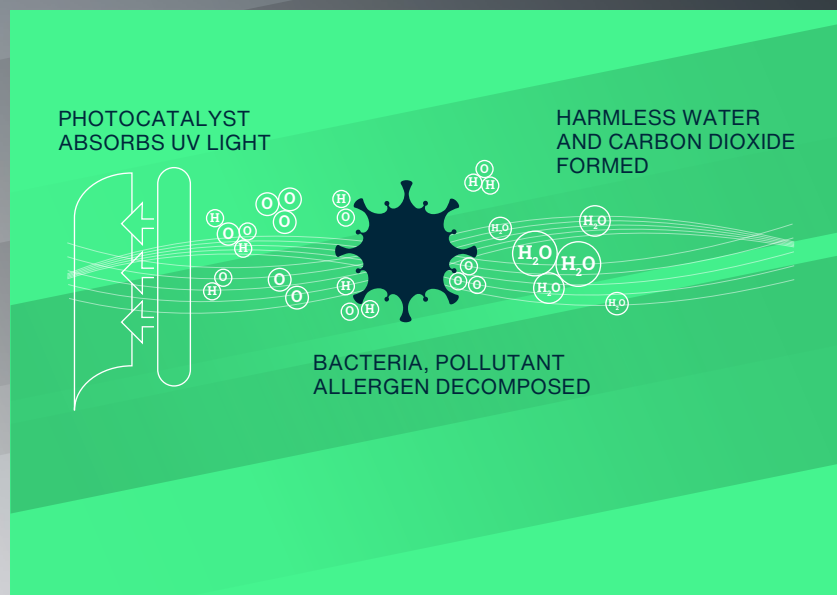

Pollen

Causing allergies

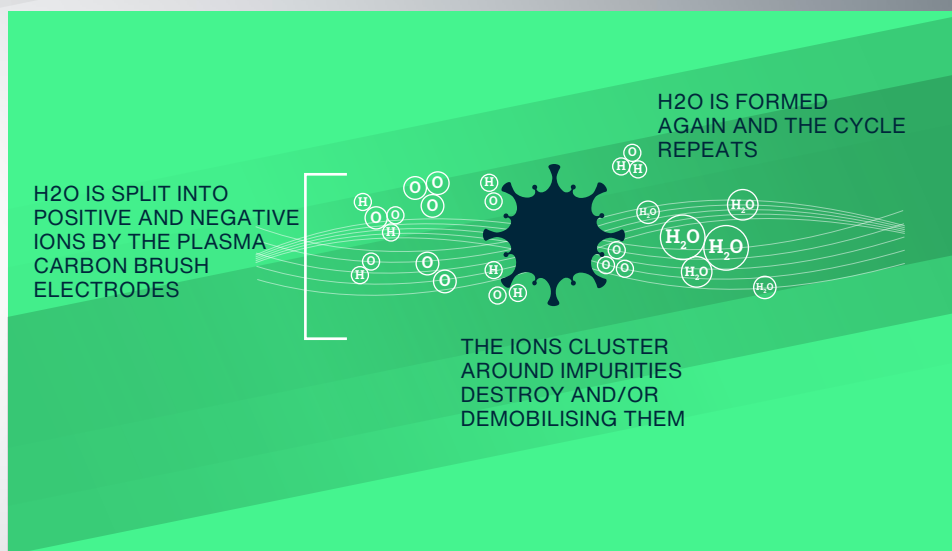

AFLPCO® Technology

An inbuilt UVC lamp shines on the Nano metal catalyst which produces an array of different negative ions (superoxide ions and hydroxyl radicals) which collide into impurities and destroy them by deactivating their DNA, causing them to be unable to multiply.

AFL PLASMA® Technology

A mix of positive and negative electrodes are produced, splitting the molecules into negative ions (OH⁻) that not only destroy impurities but sanitise surfaces as well.

OCTO PurePlace Building Pro and Mini

SANITISATION IS ESSENTIAL
in public and private spaces.

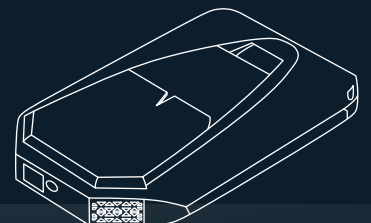

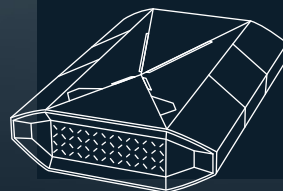

OCTO PurePlace Building is the OCTO solution for the automatic and controlled sanitisation of the environments in which the OCTO PurePlace Building Pro device is installed.

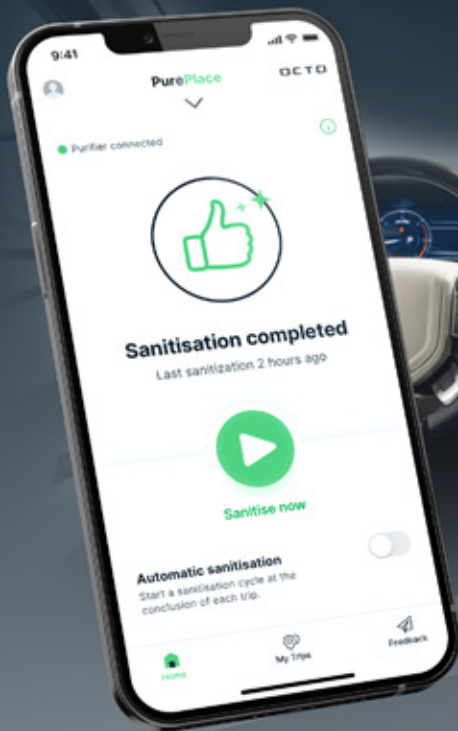

The device is easily mounted on the wall and each unit is able to remotely sanitise a 250 sqm area.

Key benefits

- Raises the bar for **health and safety**.
- **Prevents** bacterial and viral infections.
- **Easy to check and monitor** the status of the sanitised environments.
- Ensures a **rapid and complete sanitisation cycle**
- It is **simple to operate** and fits every environment.

OCTO PurePlace Car

SANITISE VEHICLES
the **automatic and controlled way**

OCTO PurePlace Car uniquely combines a purifier and telematic device to manage vehicle sanitisation.

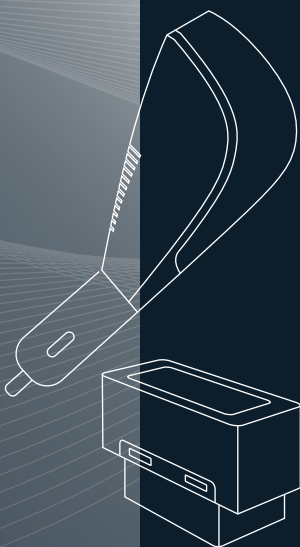

OCTO PurePlace Car purifies and sanitises cabin air and surfaces using photocatalytic oxidation thus destroying over 99% of impurities (environment and surfaces).

Key benefits

- **Reduced downtime between trips** due to continuous sanitisation during travel.
- **Easy and fast to install (self-installing).**
- **Compatible with all vehicles.**
- **Bundled with all the fleet and connected telematic services without additional devices.**
- **Manual (on demand) and automatic sanitisation management.**

Together with a digital application, OCTO DriverMate, the solution enables additional telematics services and remote control of the sanitisation.

OCTO AroundMe

MAINTAIN PROPER social distance

OCTO AroundMe monitors the behaviour of individuals in public and private areas, registering the presence of individuals and non-compliant social distancing behaviour.

It consists of a digital app and an OCTO SmartTag, equipped with the latest Bluetooth technology, which has been proven solid and reliable in connected insurance.

Once given to an individual in an area monitored by OCTO AroundMe, the solution emits an audible notification when others are too close.

Key benefits

- **Small, pocket-sized, smartphone-compatible** solution.
- Keeps people **safe and traceable** within any environment.
- Encourages compliance **with social distancing guidelines**
- Provides **real-time** alerts to **mitigate risk of exposure** in environments accessible to the public (e.g. retail shops, dealerships, agencies).
- Improves COVID-19 **containment and contact tracing**.

The logo for OCTO, consisting of the letters O, C, T, O in a bold, white, sans-serif font. The 'O's are square-shaped with a small gap in the middle, and the 'C' and 'T' are solid.

Smart Analytics for a Better Connected World

OCTO Telematics

Octo is today one of the main players offering innovative technological solutions connecting the world of mobility through advanced analytics and IoT-driven services for the new era of Smart Telematics. Since 2002, Octo has developed a database enriched with the connected users' data, who, while driving their vehicles, automatically provide data relating to the car, their driving behavior, localization, context, possible accidents, along with other complex data, which are stored and analyzed based on thousands of combinations of parameters. With Octo, customers can capitalize on the promise of today's new technology, make Big Data actionable and lead the digital transformation.
