

Capgemini and Guidewire – A Winning Combination

Leading Innovative Solutions for the Insurance Industry

Our Partnership

- Partners since 2004. Celebrating 16 years of solid partnership.
- Over 26,000 resources dedicated to the insurance sector—providing consulting, technology, and outsourcing services to more than 200 insurers around the world, including 12 of the world’s top insurance companies.
- Our team comprises of insurance industry veterans, business transformation specialists, large-scale program managers, insurance business solution architects, and technology and QA specialists.
- Capgemini’s Guidewire team has led and/or supported more than 100 Guidewire projects across North America, Latin America, Europe, and Asia Pacific.
- Extensive global network of Guidewire-certified professionals. More than 275 Guidewire use cases and 2,600 test cases.

Capgemini and Guidewire Practice Highlights

- As a leading **Global Premier Partner Connect Consulting Partner**, we have achieved specializations for the fourth quarter of Guidewire’s fiscal year 2019 for the following Guidewire products:
 - BillingCenter – Americas
 - ClaimCenter – Americas
 - PolicyCenter – Americas
 - InsuranceSuite – Americas
 - InsuranceSuite Integration – Americas
 - PolicyCenter – EMEA
 - ClaimCenter – EMEA
 - ClaimCenter – APAC
- Capgemini has been a pioneer on many fronts when it comes to Guidewire implementations and have many “firsts” to our credit. They are as follows:
 - Delivered one of the original Guidewire partner-led engagement

- Delivered one of the earliest partner-led Guidewire InsuranceSuite implementation
- Worked on the industry's first Guidewire PolicyCenter implementation
- Guidewire partner to use accelerators and develop an asset-driven implementation approach
- Guidewire partner to complete an independent Guidewire upgrade
- Guidewire partner to develop an India-based offshore capability (in 2007)
- To deliver GW Application Management Services on a fixed-price SLA drive basis
- Guidewire partner to sign a multi-year Application Management Services agreement
- To implement Guidewire in a cloud-based, PaaS model and on an "on premise" basis
- Helped Guidewire create its Expert Services approach

We utilize industry-leading practices and proven tools to help optimize Guidewire-enabled transformations and implementations. Our proven Guidewire implementation assets and resources allow companies to speed deployment and leverage the experience of our global network of certified Guidewire professionals, cost-effectively. These include:

- Project accelerators and assets specifically designed for Guidewire products.
- Standardized frameworks for development, testing, reporting, and application management.
- Proven processes for change and program management, project estimation and requirements analysis to support engagement success.
- A Delivery Workbench that includes business analysis and design frameworks; prebuilt testing artifacts; prebuilt data conversion maps; reporting and business intelligence frameworks, and an integration framework.
- Capgemini has developed a Global Upgrade Factory with more than 100 dedicated resources focused exclusively on Guidewire upgrades.
- In addition to our Guidewire training/certified staff, we have over 400 Guidewire experienced business analysts, data migration/conversion specialists, and data, reporting and analytics specialists.

Capgemini and Guidewire Specific Offerings

Capgemini's Guidewire-technology expertise spans the entire Guidewire suite of products. Our extensive expertise enable our clients to:

- Reduce the total cost of Guidewire application ownership by up to 40%.
- Optimize functional alignment with business processes and operations.
- Augment Guidewire analytics, business intelligence and re-orting functionality.
- Manage/support Guidewire IT operations.
