

Accurate measurements for every property

HOVER transforms smartphone photos of any property into an accurate, interactive 3D model, including all line lengths and surface area measurements for the roof, siding and openings. Use HOVER's comprehensive property data set to reduce cycle times and improve policyholder satisfaction.

What's in it for you

Improve customer experience
 Allow policyholders to take ownership of the claims process by inviting them to capture photos and give transparency into measurements.

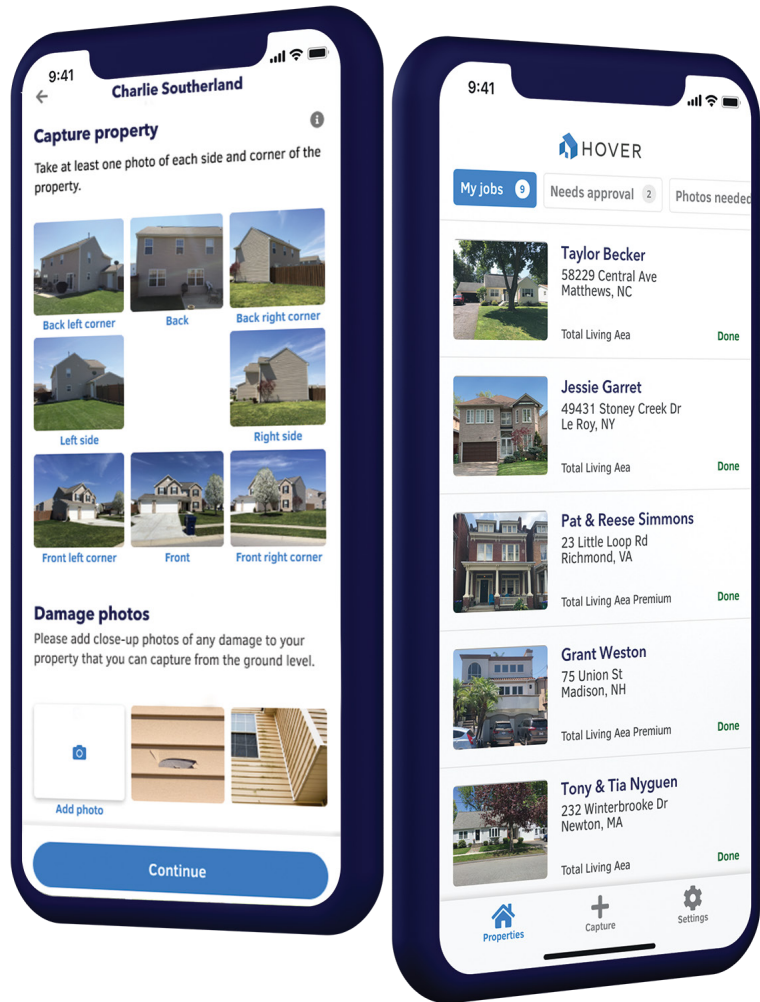

Reduce cycle times
 Let policyholders or service providers capture property photos so you can resolve claims within hours versus days or weeks.

Access data on any property
 HOVER's ground-level, mobile imagery translates into real-time data for any property anywhere in the world.

How It Works

1. Inspector uses HOVER or invites the homeowner to the platform
2. Inspector or homeowner takes photos of the property and damage
3. Inspector resolves the claim with HOVER's data package

Join thousands of customers who use HOVER daily

With HOVER, our inspectors can handle more claims per day at a faster pace with great accuracy.
