

Verisk *Ready for Guidewire* Accelerator for A-PLUS Property

> Guidewire PartnerConnect Solution Overview

The Insurer Challenge

Understanding claims history is critical to accurate initial quoting. But to cut costs, insurers often wait to order loss history just before bind. This can change the quoted price, affecting the customer experience. There's a better way. A-PLUS™ Property loss history solutions economically deliver the insight you need at point of quote.

The Solution: A-PLUS Property

This solution provides an A-PLUS Property loss history indicator—Claims Activity Profiler (CAP)—and full detail report accelerator. This allows insurers to fast-track requesting and ordering of A-PLUS Property CAP indicators and/or full detail reports through Guidewire. A-PLUS™ Property solutions from Verisk deliver loss history insights to help insurers refine their initial quotes. The solutions draw from Verisk's robust loss history database, powered by insurer contributions.

Solution Benefits

- Helps guide critical underwriting and rating options as early as point of quote
- Aids expense optimization by providing the choice of an indicator or full-detail report
- Improves sales resource and workflow efficiency on targeted prospects
- Facilitates more accurate initial quotes and helps avoid upcharges at bind while promoting a more seamless quote-to-application experience for new high-value policyholders

Integration Benefits

- Easy to integrate loss history data into underwriting workflow for increased efficiency, smarter risk decisions, faster transactions, and superior customer experience
- Limits the need for additional resources and eases integration so insurers can consume solutions with a comprehensive view and actionable insights
- Designed to help insurers complete their integration faster and more efficiently.
