

VIPR AT A GLANCE

FOR INSURANCE AGENTS
AND BROKERS

VIPRSOLUTIONS.COM

WELCOME TO VIPR

VIPR is an award-winning provider of technology solutions for the insurance market. Our unrivaled market insight has secured our reputation as industry innovators. Driven by our clients – Insurers, Brokers/Agents and Managing General Agents – our combined product offering improves the management of your program business portfolio, drives operational efficiencies, and addresses the ever-growing compliance and regulatory burdens.

We know insurance. At VIPR we deliver a comprehensive suite of dedicated technology solutions – providing end-to-end management of your program business. Our IT solutions are easy to use, designed to make the complicated simple.

VIPR is an open, transparent company with direct access to top management, right through to product developers, meaning you benefit directly from their knowledge and technical excellence.

WHAT VIPR OFFERS

- > Industry-leading experts in the program business space
- > End-to-end platform that makes managing the data supply chain fast and efficient while maintaining the highest levels of security
- > Giving you the tools to take a strategic view of your entire program business providing your key partners with tailored reporting across underwriting, financial and operational metrics, giving you total control
- > Service excellence is at the center of our ethos, ensuring we provide continued support to you every step of the way
- > Solutions that are designed to make the complicated, simple.

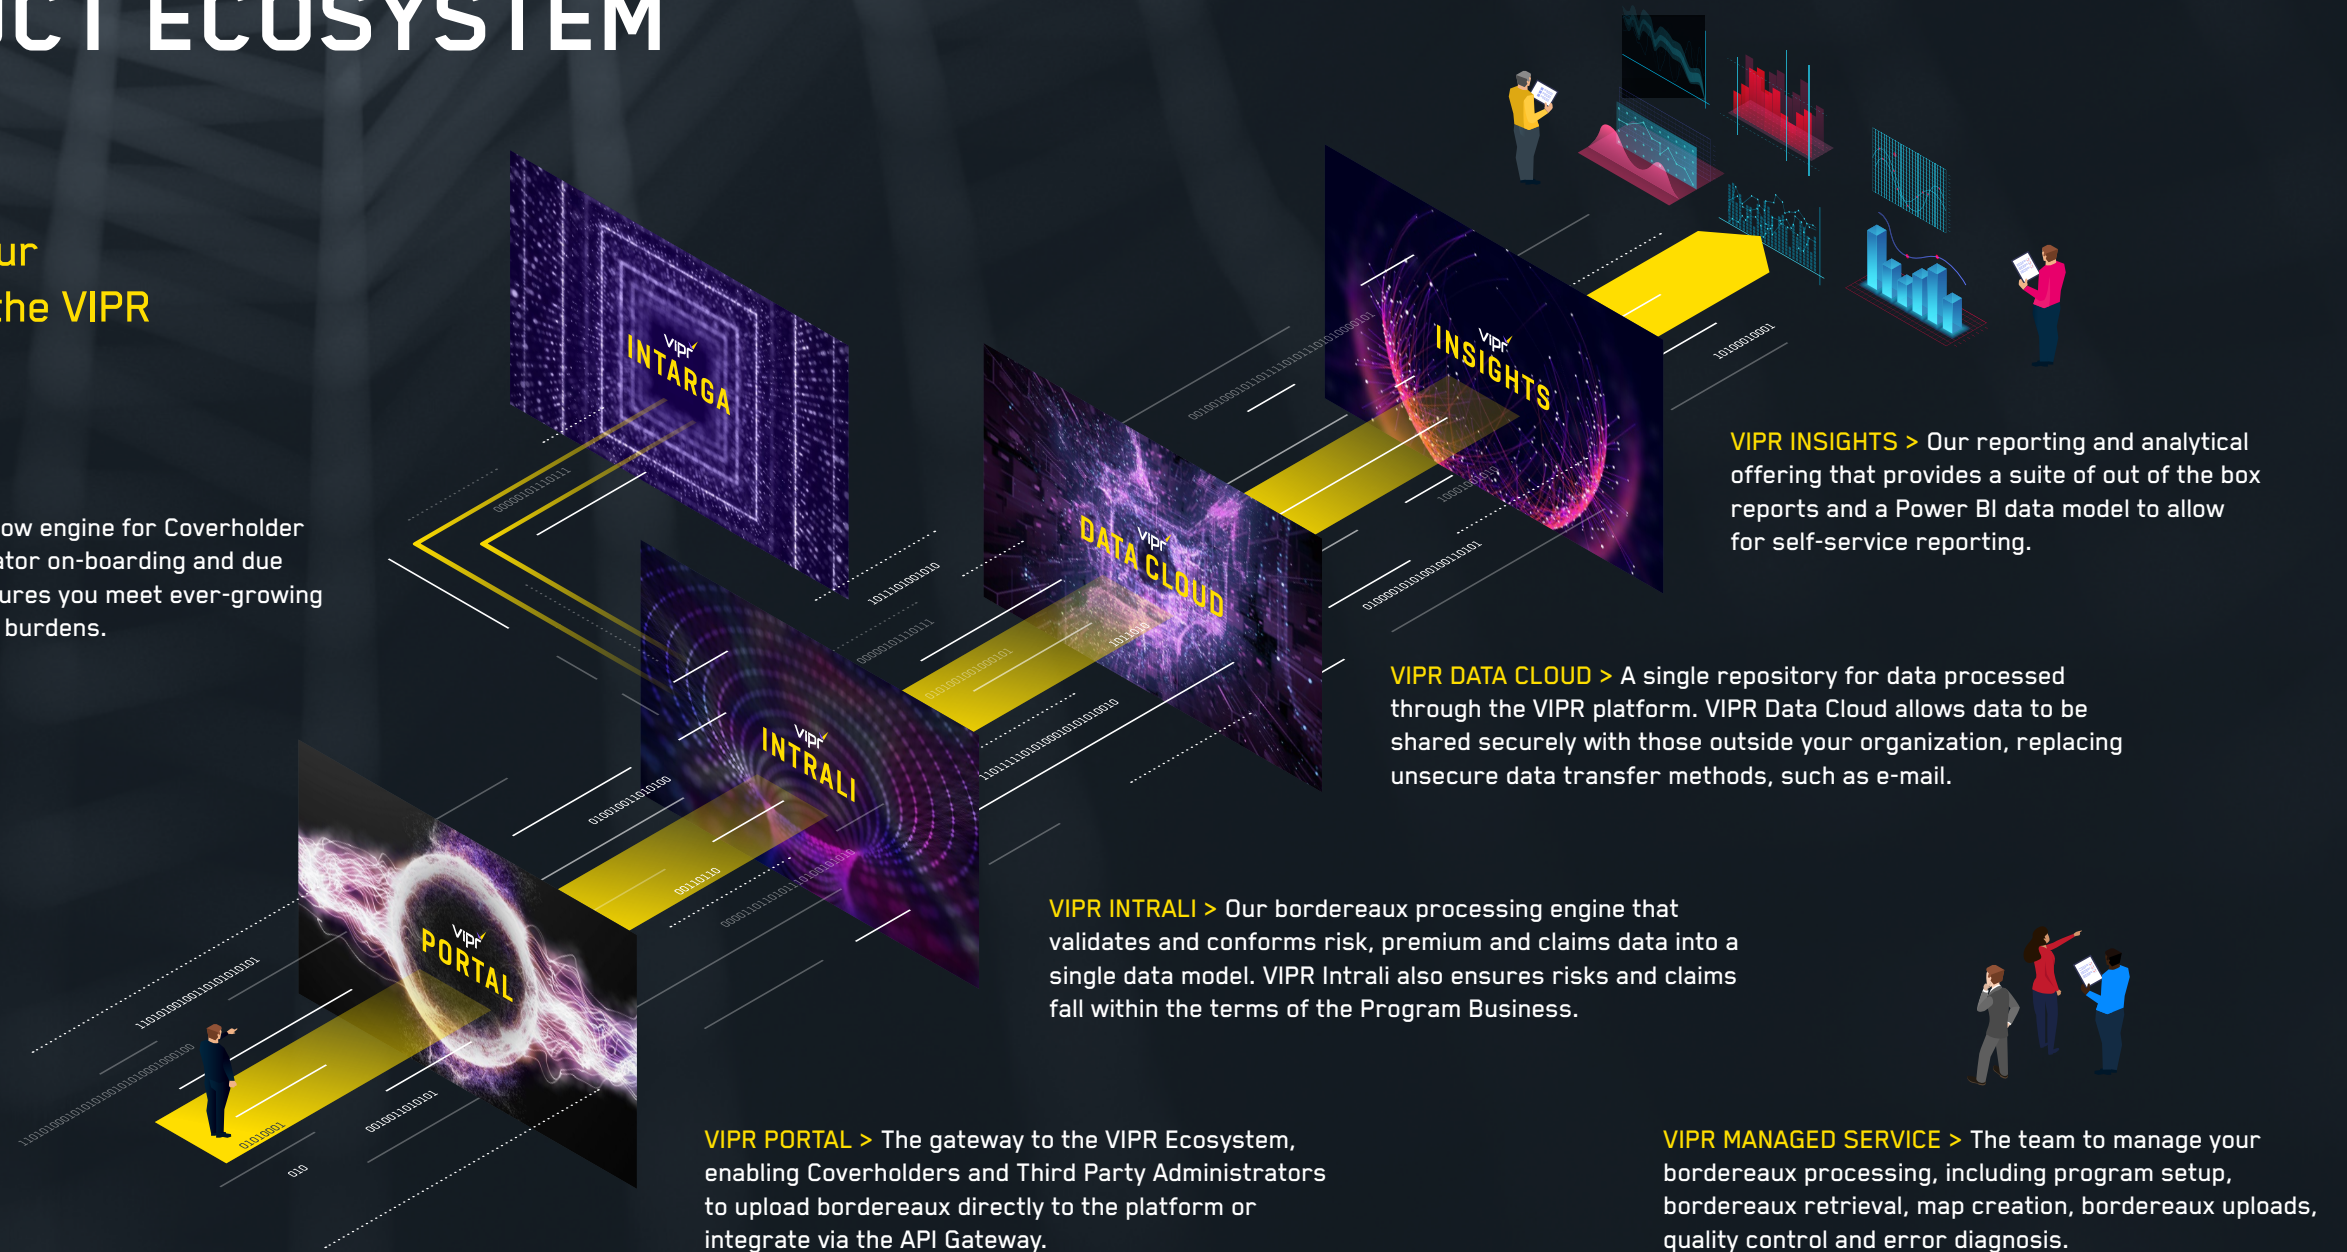

VIPR PRODUCT ECOSYSTEM

Have total control over your program business within the VIPR Product Ecosystem.

VIPR INTARGA > Our workflow engine for Coverholder and Third-Party Administrator on-boarding and due diligence. VIPR Intarga ensures you meet ever-growing compliance and regulatory burdens.

AGENT/BROKER

- > Benefit from seamless workflow with the highest security levels
- > Take a snapshot view with our performance dashboard or control the entire reporting and analysis process with our pre-set reporting suite
- > Achieve increased efficiency, higher security and a 360 view of your programs or entire portfolio
- > Take total control over the entire Program Business process.

OUR PRODUCT SUITE

VIPR PORTAL

VIPR Portal is your digital gateway, providing secure and efficient data-sharing capabilities.

Our solution provides the perfect platform for a seamless data transfer between systems, while mitigating security risks such as data breaches associated with sending files via email. Data can flow into VIPR Portal in a number of ways, including API integration and direct database connection.

VIPR Portal is a multi-tenant SaaS platform and is fully integrated via APIs to the entire suite of VIPR products. It is also fully customizable to align with your individual company brand, providing a consistent brand experience to your clients across all touch-points.

VIPR INTRALI

VIPR Intrali is your software solution for bordereaux processing and management.

It standardizes large amounts of bordereaux data, importing and converting multiple data formats to a single template determined by you.

As well as cleansing the data, the system checks and validates it against the program terms. Advanced software features expand on collated data, adding value by making data more informative.

All this is underpinned by an intuitive user interface that makes VIPR Intrali quick and simple to use.

VIPR INTARGA

VIPR Intarga provides you with workflow management and processes for coverholder approval, due diligence and monitoring, as well as audit management and Program Management.

By configuring a company's workflows so that it mirrors its own processes and procedures, VIPR Intarga makes information easy to extract and monitor.

VIPR Intarga micro-manages: it not only assigns tasks to the relevant department or individual, but tracks performance by providing an audit trail. VIPR Intarga even provides diary alerts to highlight deadlines, ensuring you know what needs to be done, when and by whom.

VIPR DATA CLOUD

VIPR Data Cloud provides a single repository for all data processed through the VIPR platform.

VIPR Data Cloud allows data to be shared securely with those inside and outside your organization, replacing unsecure data transfer methods and ensuring that all parties have a common and consistent view of risk, premium and claims data.

VIPR Data Cloud enforces strict participation rules, so that each party can only access the data to which permission has been granted.

When combined with VIPR Insights, all parties can access the same dashboards, reports and analytics, providing a consistent view of performance.

VIPR INSIGHTS

VIPR Insights offers a fast and efficient solution for data analysis and management. By rendering transparent processes, it helps organizations to fully understand their business and the associated risks.

A straightforward report builder, VIPR Insights runs, stores, exports, shares and creates reports - in real time.

All reports are formatted to your specifications, so data and information is consistent and easy to access. You can even design your own report simply and quickly when required.

VIPR Insights has advanced features that enhance and expand data. It provides you with the information that you need to make informed decisions to better manage risk.

VIPR MANAGED SERVICE

VIPR Managed Service is a bordereaux management solution that is flexible to your needs, whether on a permanent or temporary basis. We provide a pool of talent that understands the insurance industry, its challenges and its evolution.

Fully trained by VIPR, staff are regularly coached to maintain best practice. Based in London, your VMS support team is available on demand to serve your requirements.

OUR CLIENTS

We work with a wide range of companies from small Managing General Agents to some of the world's largest Agents, Brokers and Insurers.

[View our full client list >](#)

We saw clear opportunities in moving to a system for bordereaux management that allowed us to standardize multiple data sources and reap the resulting benefits of centralized processing and single-source business intelligence. VIPR impressed us with its system and it was clear from the company's reputation and professionalism that they could deliver for us. VIPR has worked well with our business and testing teams to tailor the system to our requirements and move into production quickly. Our business is looking forward to benefiting from the software as well as opportunities to roll out VIPR Intrali across our International operations."
