

Automatically smarter | Exponentially faster | Remarkably flexible

Our decision software offers faster, more accurate claims triage and assignment that improves life for insurers and customers, assigning claims in seconds – even during catastrophic events!

What can Claimatic do for you?

Take a concrete step today to address employee turnover and recruitment

Your best staff and the best recruits all know that automation can help lift the drudgery of recurring manual tasks.

Claims automation can be a big part of your employee happiness picture.

Be prepared for the unpredictable: what season isn't CAT season these days?

You can't plan for the unexpected, but you can prepare so you can respond more nimbly.

Step in at a key moment in the customer lifecycle

Claims is not an area where you can cut corners, waste time, or risk errors.

A poor claims experience is one of the leading contributors of customer dissatisfaction!

The Facts

- 22% Reduced loss adjustment expense
- 14% reduced policy churn
- 40% re-assignment rate reduced to <5%
- 2.5 minutes saved at FNOL
- 15% NPS improvement
- 1.3 more claims per day per resource
- \$25k saved one day, one event, across dozens of claims

Claimatic plugs into your existing tech stack and pulls the pieces together!

Our tool quickly evaluates claims, brings the right data together from different systems, matches resources, and continuously monitors the whole ecosystem.

“ Claimatic has cut the time I used to spend shuffling claims first thing every day and given me time back in the mornings.

— Property Claims Manager,
US Auto Carrier

”

What you get with Claimatic

Automated Claims Assignment

Assign claims in seconds after evaluating more than 25 standard and unlimited custom attributes.

Custom Dashboards & Reports

Monitor claim assignments, resource availability, capacity, licenses, skills, and more via standard or custom dashboards or reports.

Scenario Planning

Create and test scenarios outside of production and deploy at will. Easily revert back to normal operations once the surge has passed.

Workforce Management

Create and test scenarios outside of production and deploy at will. Easily revert back to normal operations once the surge has passed.

Plain-English Rules

Build rules using simple if/then logic and then drag-and-drop them into place.

Data Management

Maintain a top-down, categorial data structure that enables you to make quick changes in mass without disrupting business.

Low-code and Cloud-ready

Bring Claimatic online in weeks without overtaxing your IT teams, and be confident you can make changes on the fly and transition to the cloud.

Optimal claims assignment is highly complex. Our partners get more effective claims triage through automation, while maximizing the skills and energy of their people.
