

Automatically smarter | Exponentially faster | Remarkably flexible

Our decision software makes efficient decisions in real time. Each claim has over a million possible decision permutations, but Claimatic considers all of these and assigns the optimal agent in just a few seconds.

Your current data is made even more effective with Claimatic implemented.

How does Claimatic improve claims outcomes during CAT events?

- **TRIAGE:**

Claimatic segments CAT claims based on any data point collected in your current software. You can pre-stage, test, and have on standby multiple CAT scenarios to bring into or out production as needed.

- **PRIORITIZE:**

Claimatic segments CAT claims based on any data point collected in your current software. You can pre-stage, test, and have on standby multiple CAT scenarios to bring into or out production as needed.

- **ACTIVATE CAT TEAM:**

Enable/disable the pre-staged CAT team, then add/remove team members & leaders as needed.

- **ENABLE CAT TEAM:**

- Update capacity limits & territories en masse via bulk user management

- **NEIGHBORHOOD ADJUSTING:**

- Use the interactive map tool to define territories via radius or custom polygon down to the block level. Create response quadrants or "pie slice" territories in the impact radius for internal and/or vendor resources. Adjuster mobile app allows dynamic, real-time radius.

Did you know?

Last year, insured losses from natural disasters again exceeded the previous 10-year average? This is in line with the annual trend of 5-6% rise in losses seen in recent decades.

Claimatic considers all of the possible decision permutations and assigns the optimal agent in just a few seconds.

This leads to lower costs and happier customers, even during CAT events.

Claimatic can be set up in weeks, not months.

“
Within one week,
we were able to
complete
training and go
live in six days.

What you get with Claimatic

Automated Claims Assignment

Assign claims in seconds after evaluating more than 25 standard and unlimited custom attributes.

Custom Dashboards & Reports

Monitor claim assignments, resource availability, capacity, licenses, skills, and more via standard or custom dashboards or reports.

Scenario Planning

Create and test scenarios outside of production and deploy at will. Easily revert back to normal operations once the surge has passed.

Workforce Management

Create and test scenarios outside of production and deploy at will. Easily revert back to normal operations once the surge has passed.

Plain-English Rules

Build rules using simple if/then logic and then drag-and-drop them into place.

Data Management

Maintain a top-down, categorial data structure that enables you to make quick changes in mass without disrupting business.

Low-code and Cloud-ready

Bring Claimatic online in weeks without overtaxing your IT teams, and be confident you can make changes on the fly and transition to the cloud.

Proactively future-proofing with Claimatic will set you up to scale quickly. By adapting and working toward automation now, you can keep pace with competitors and create a fulfilling place for employees to work for the long haul.
