Solution Overview

Challenge

Commercial insurers spend a vast amount of time and resources in analyzing unstructured submission documents, extracting relevant data, and pre-processing it before presenting it to underwriters. This results in a high cost of business acquisition, low straight-through processing rates, pricing inadequacies, and poor experience delivery for brokers and customers. It therefore comes as no surprise that Gartner rates 'Digitally Engineered Underwriting' at the peak of inflated expectations, in its latest report of Hype cycle report.

Solution

CogniSure's purpose-built solution for commercial lines, Submission Insights, helps you automate the ingestion of submission documents such as application forms, loss runs, SOVs, and schedules, automates key pre-underwriting decisions, and unlocks insights for better decision-making. Submission Insights helps you write a more profitable business in less time with fewer resources.

Benefits

- Boost Underwriting Capacity by 3X - Eliminate tedious manual data extraction from complex submission documents.
- Improve Quote Turnaround Time by 50% - Compress the pre-underwriting process from an average of 3-5 days for middle-market to minutes.
- Reduce Premium Leakage by 20% - On-demand access to 500+ risk insights and scoring for greater accuracy.
- Enhance Market Experience - Effectively collaborate with brokers and customers through quicker turnaround times.

About Partner

CogniSure is a pioneering technology company at the forefront of revolutionizing the insurance industry through automation. Specializing in commercial insurance, CogniSure's advanced platform leverages modern technology to optimize the insurance processes, drive efficiency, and elevate customer experience.
