

Intelligent  
Intake means...

more quotes  
in less time to bind

## Automate underwriting workflows with the Indico Data Intelligent Intake Solution

Increase underwriting capacity, Improve your loss ratios, and experience premium growth with Indico data's Intelligent Intake solution. By automating these critical workflows, you can improve your decision-making process by accurately assessing risk with speed and accuracy while avoiding tedious, manual tasks, allowing you to deliver more business value.

### Only Indico Data enables carriers to

#### Increase efficiency

Accelerate the underwriting process, streamline your process efficacy, and reduce intake process costs all while being empowered to prioritize high-quality business, improve loss ratios, and reduce time-to-bind.

#### Improve loss ratios

Get the data you need before making coverage and liability decisions while better controlling loss ratios with guidance on when you should quote. Now, you can respond more quickly to win more of the business you want.

#### Reduce intake costs

With our AI and ML technologies, you can reduce your intake process costs with full confidence that processes will adhere to industry best practices, ensuring compliance while preventing underwriting leakage.

#### Write more premiums

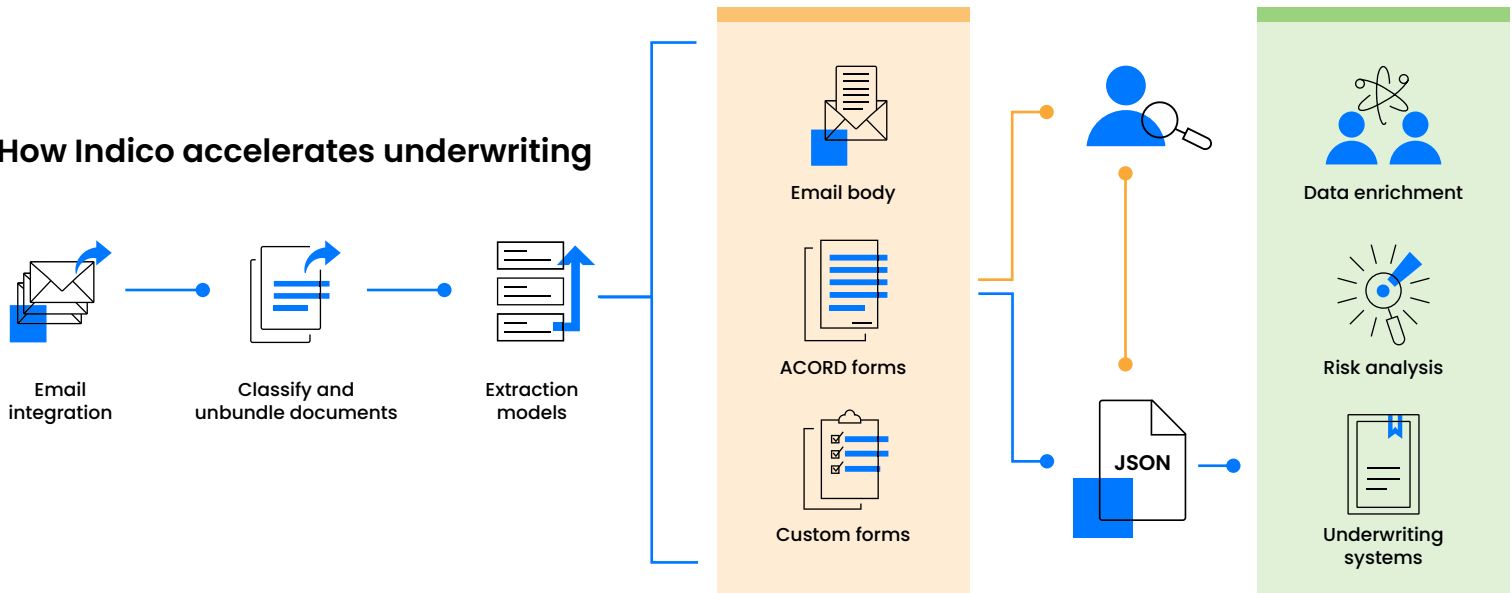

Automating your submissions intake process not only allows you to write more premiums but also handle a larger number of submissions in less time and with no upper limit to intake capacity.

*Indico's unique technology advantage addressing unstructured data combined with their business-first application experience enables us to solve a breadth of use cases that we previously had been unable to automate.*

# Intelligent intake, intelligent underwriting

With Indico Data, you can reduce manual document handling by 70%, increase process capacity by a factor of four, and reduce resources required by as much as 80%. We remove administrative inefficiencies, so underwriters can focus on doing what they do best: analysis, adjusting models and keeping loss ratios under control.

## How Indico accelerates underwriting

## DocumentDNA™ powers intelligence

At the heart of Indico Data's solutions is DocumentDNA, our proprietary approach to modern AI and machine learning. DocumentDNA enables seamless multi-channel, multi-document intake for any format, using accurate, automated processes that keep your employees "in the loop" – giving you the power to make more informed decisions faster.

### Highest Accuracy

Powered by an AI-driven, multimodal fusion approach to document understanding, we gather both semantic and visual information to drive decisioning

### Fastest Time to Value

Our unique approach to transfer learning enables you to build custom ML models with as few as 200 sample documents – not thousands

### Strongest ROI

Enabled by a patented ML interface, non-technical users can create custom models with our "bionic-arm" approach to stay in the loop of the processes they are automating

**\$30M**  
increased  
premiums

**60%**  
increase in  
process capacity
