

Turn unruly data into powerful pricing decisions

Legacy technology is undermining pricing transformation. Do these challenges sound familiar?

Pricing models are painfully slow to build

Excessive time spent on low-value tasks

No portfolio-level view of performance

Governance and compliance headaches

Dependence on IT for deployments

Transform your pricing with hx Renew

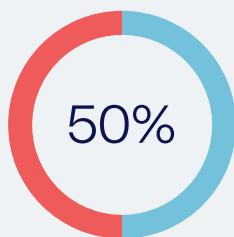

hyperexponential's pricing decision intelligence platform, hx Renew, helps (re)insurers unlock efficiencies through every step of the pricing ecosystem, enabling customers to target a 3–6% improvement to their combined ratio.

3–6% pt

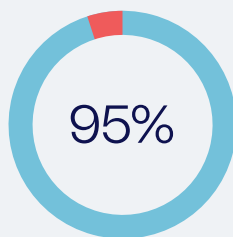

Targeted improvement in combined ratios

\$37bn

Leading global insurers trust us to write in GWP each year

Reduction in quote-to-bind time

Reduction in time to renew a policy

hx Renew is a purpose-built platform that empowers (re)insurers to price complex risk with greater speed, intelligence, and confidence.

10^x

Faster to build a new model

12^x

Faster to deploy model changes

Unlock Pricing Decision Intelligence

Benefits

Build, deploy, and refine pricing models with ease

- Build models in native Python up to 10x faster
- Deploy in a few clicks without reliance on IT
- Leverage ready-made and reusable components

Create an integrated underwriting workflow

- Reduce submission-to-bind time by up to 50%
- Eliminate re-keying through seamless integrations and surface all relevant data at the point of pricing
- Accelerate peer review with automation

Profitable pricing decisions with the right context

- Track live rate change and portfolio performance
- Run rapid what-if analyses and develop high-quality management information
- Visualise data in custom dashboards

Our customers

Self-built their first model within two days, built 20 models in 9 months to support all specialty lines

Full integrated tech stack with hx Renew at its core — operating alongside other best-in-class insurtech

Modular build with reusable components across one global pricing platforms

What they say

"hyperexponential is helping us harness data, improve performance, and drive profitability."
Kevin Cleary, CIO, Optio

"We have found hx Renew to be an excellent pricing and underwriting tool – a big step forward from spreadsheet models which took up a lot of actuarial time to maintain."
Samantha Tanner, Chief Actuary, SCOR

"[hyperexponential is] combining deep industry knowledge and modern software expertise to create technology tuned for the 21st century."
Paul Brand, CEO, Convex
