

Streamline your claims workflow and boost outcomes with the ODG Accelerator. The ODG Accelerator works to optimize outcomes and support adjuster decisions by seamlessly and automatically applying valuable ODG data to workers' compensation and auto injury claims. Designed to create workflow efficiency, the ODG integration solution ensures that claims managers can consistently leverage ODG insights on every claim, resulting in improved efficiencies and more effective claims management. Experience a smoother, data-driven claims process, by delivering better results for your organization.

Ready For Guidewire  
Cloud

## Growth Partner

*Ready for Guidewire Validated Integration*

# ODG by MCG Accelerator for ClaimCenter

## Challenge

- Detecting claims that are likely to become high-cost and problematic early on within the claim lifecycle
- Helping claimants return to work safely and quickly as supported by industry-standard workers' compensation duration guidelines
- Finding evidence-based medical decision support and data dashboards
- Providing clinical evidence within the claim adjusters' workflow to improve the speed and quality of decision-making
- Utilizing a bill review rules engines supporting opportunities for automation

## Solution

ODG's industry-leading medical treatment and return-to-work guidelines combines evidence-based medical literature (evidence-based medicine) with claims data analytics (data-driven medicine) to work in concert to optimize outcomes with the right level of intervention. Our powerful integration of data and medical evidence enhances efficiency and elevates the quality of decision-making for both auto injury and workers' compensation staff.

## Benefits

- Provides upfront, clear targets for forecasting and reserving workers' compensation and auto injury claims
- Identifies high-risk claims early on within the claim lifecycle using predictive analytics
- Opens the lines of communication among all parties in the return-to-work/return-to-health process by providing a common framework based on existing (and emerging) medical evidence
- Enables configurable triggers for better benchmarking and improved visibility around thresholds

## About Partner

ODG provides unbiased, evidence-based guidelines that unite payers, providers, and employers in the effort to confidently and effectively return injured parties to health. The clinical guidelines and analytical tools within ODG are designed to improve and benchmark return-to-work performance, treatment duration and intensity, facilitate quality care while limiting inappropriate utilization, assess claim risk for interventional triage, and set reserves based on industry data.
