Updraft Demonstration

[Updraft Demonstration Login](#)

Updraft

- Drafting automation
- Deadline and contract expiry alerts
- Central repository of documents
- Inbuilt data and document security
- Integrated compliance and risk management
- Activity audits and version control
- Tailored user privileges
- Managed document ownership
- Powerful search engine on multiple fields
- Realtime data analytics and graphs
- Legal support and consulting

Mattermap

MatterMap gives you all the benefits of the Updraft solution, as well as:

- Workflows driven by contracting terms: triggering next steps, new documents, escalations etc.
- Capture data only once and then share it across multiple documents in a workflow
- Track time & costs across an entire matter/project
- Bulk projects, applications and claims processing
- Automated collation of documents from third parties
- Send documents and emails directly from Updraft, with the results stored in the correct Matter folder
- Automated sign-offs, approvals and escalations, with native e-signature at no extra cost
- Manage long-term, complex relationships, projects or litigation matters

UpSign

- Allows for paperless, end-to-end drafting, signature and filing of all documents
- Accelerated signature workflows, driven by automated notifications and escalations, with electronic document distribution
- Formally accredited and includes three-factor authentication, PKI capability, digital certificates & advanced cryptography.
- Real-time audit trails that show who has signed and who still needs to sign.
- Digital signatures applied to tamper-evident, protected documents, using bank-level security protocols, cryptographic algorithms and key lengths.
- Removes the printing, scanning, archiving and courier costs associated with signing paper documents

CoDraft

- Negotiate and settle documents online, with anyone
- Track changes and enforce a full record of all amendments
- Collaborate with external parties, without your documents leaving the Updraft platform and without any need to email or upload documents
- Reporting and contract lifecycle data is reconciled on finalisation of signature versions
- Manage all the versions of a document, with user-linked activities and a complete audit trail of changes

Transform your bottom line and discover the true power of your skilled staff. Don't let repetitive drafting sap valuable resources

ELIMINATE the time, legal fees and resources that your business wastes in drafting, checking, amending, renewing and storing your company contracts and documents; and

DRASTICALLY REDUCE the internal costs that your business incurs to meet its legal compliance, reporting, risk management and corporate governance obligations.

Benefits that come standard with Updraft:

Legal drafting time is reduced by 80%

Our mature integration platform allows our best-of-breed legal tech solutions to fit seamlessly into your broader operational ecosystem, injecting powerful data insights, efficiencies and intelligent workflows into your core business processes.

A **controlled drafting and questionnaire process** eliminates the risks associated with badly drafted correspondence and settlement proposals

Advanced electronic signature process to ensure a **paperless** end-to-end claims management

Every document is automatically stored in a **central repository**

All **system customisation, deployment and training** is handled by Updraft

Automated notifications of deadlines; intelligent coordination of next steps, data-driven task allocation, managed escalations and advanced warning of key dates

A full audit trail of all steps taken in the claim processing, including all correspondence, notes, settlement proposals and court documents

Collaborate with external parties by using CoDraft to agree and record the final terms of your settlement agreements and other documents

Extremely powerful **search and filter functionality**

Provides a **central, secure, online repository of all claim documents and history** – in a single view of the claim

Case settlement data becomes a powerful resource that drives **forecasting, indexing, reporting and business intelligence functions**

Updraft 
COMPLETE CONTRACTING

Updraft's specialist expertise ensures seamless solution delivery:

We have done this before and can help navigate this journey with you

On more than 50 other occasions, we have implemented legal management software solutions for clients across the globe. Our legal consulting team tailors every solution to the unique needs of the client.

We know the law and are experts in litigation, helping you drive turnaround strategies

We're staffed by qualified corporate lawyers, with hard-won practical insights into legal practice and the challenges of inhouse legal operations. We're able to contribute specialist legal knowledge and deep experience, to optimise the impact of your legal tech.

We match your geographic footprint and understand South African law

We're a local South African company with offices in South Africa. Apart from our diverse professional expertise and practical experience in implementing an supporting legal tech solutions, we have a meaningful understanding of the economic, political and social context within which South African companies operate.

End to end partnering capabilities

We offer our clients an end-to-end solution, in which we handle the implementation and manage the process culminating in the release of not only a contract management solution, but also a platform that drives efficient business and compliance processes, digital signatures and online collaboration - ready for use on day one and customised for your unique environment and processes.

Our broad expertise enables a comprehensive, pragmatic strategy

Our breadth of capabilities including Strategy, Compliance, Technology, Governance and Legal Consulting enables us to co-create a comprehensive solution that is driven by rigorous professional analysis and a complete understanding of the challenges to be solved.

Our Legal Management Consulting expertise

Updraft's Legal Management Consulting is a professionally focussed methodology that builds on mainstream legal support and advisory services, legal tech expertise and compliance analysis to help you run your legal operations processes and drafting more efficiently, effectively and with constant focus on compliance and efficiency.

Updraft's legal management consulting services are the product of years of deep experience in the design, development and deployment of niche legal software and support solutions that are tailored for the South African market, and which draw on the skill and long experience of our multi-disciplinary legal and technology team.

The services and tech solutions are configured to fit seamlessly within the client's unique environment – fully customised to meet their specific compliance, risk, legal and financial challenges.

We see it every day:

Escalating day-to-day demands and stretched resources prevent efficient legal drafting and compliance management.

Updraft has the tools, methodologies, and experience to help aspirational legal leaders lift their teams out of the tangle of everyday work and refocus on strategic priorities and real outcomes.

This is not a one-size-fits-all proposition; the path to success is unique to every client. Updraft practitioners from numerous disciplines collaborate on a long-term roadmap to realise the client's vision.

We benchmark that roadmap with achievable goals, and work with the client from inception to completion.
